

3nine Group

3nine AB expands and forms three new companies: 3nine Industries AB, 3nine Automotive GmbH and 3nine Shipping AB, all under 3nine Group.

Since the beginning of its history, 3nine has always been dedicated to its mission of providing clean air mainly within the metalworking industry. Now, 18 years later, we are expanding our business by establishing new companies as we aim to further develop our various business areas. As of 1 April 2020, three new entities have been formed: 3nine Industries AB, 3nine Automotive GmbH and 3nine Shipping AB.

Metalworking, the largest business area, will be exclusively taken care of by 3nine Industries AB, alongside subsidiaries 3nine GmbH in Germany and 3nine USA Inc. in the US, with 3nine AB being the sole owner and parent company. The new company will continue to focus on securing the work environment in the global manufacturing industry.

3nine Automotive GmbH will be principally involved in supplying active crankcase ventilation systems for the automotive industry. As truck and passenger car manufacturers are facing stricter emission regulations, these active crankcase ventilation systems are becoming a necessity. At 3nine Shipping AB, on the other hand, work is well under way to develop new technologies to support the shipping industry.

“Clean air is one of the key concerns for both human health and the environment. With the newly established companies broadening our business horizons, we want to highlight our thrust of helping more people and companies to enjoy clean air, something we consider a privilege.”

Oskar Olai

CEO, 3nine Group
